

How does the matching process work for the US programs?

Last Modified on 01/12/2022 6:35 pm EST

There are many factors that go into the matching process including: geography, mentee goals, company diversity and functional area diversity. If a mentee has any specific criteria that is important to them, they may add that to the matching survey, and our mentoring matching committees will take that into consideration to find the best possible match.
